PROFILE

QA Automation Engineer with 2+ years of experience automating E2E, regression and API tests for web applications with Selenium WebDriver, Java, Serenity BDD and Cucumber, using the Page Object Model and CI/CD integration. Experienced in functional testing (smoke, regression, integration), REST API validation with Postman and data verification with SQL, working in Agile teams (Scrum/Kanban) with Jira, Azure DevOps and TestRail. English B1 (technical), working toward B2.

EXPERIENCE

QA Automation Engineer

Nov 2024 – Jun 2026

Independent test automation project, working directly with a Senior QA Automation Engineer · Remote, Colombia

- Automated E2E regression scenarios with Selenium WebDriver, Java, Serenity BDD and Cucumber, cutting manual regression effort in every release cycle.
- Stabilized the suite with the Page Object Model and explicit waits, reducing false failures across runs.
- Caught important defects before production through smoke, regression and integration testing.
- Validated REST endpoints with Postman (GET, POST, PUT, DELETE, HTTP codes, JSON) and found contract inconsistencies.
- Verified data integrity with SQL queries (JOIN, GROUP BY) across business processes.
- Logged defects in Jira with steps, evidence and expected vs. actual results, working closely with developers.
- Integrated the suites into CI/CD pipelines with automatic feedback on every run.
- Sped up Gherkin scenario design with AI assistants, reviewing every result by hand.

Freelance QA Tester

Oct 2023 – Sep 2024

Collaborative projects · Cartago, Colombia

- Automated E2E flows with Selenium, Serenity BDD and Cucumber across several projects, reducing manual testing on every delivery.
- Defined Gherkin scenarios aligned with functional requirements to cover the acceptance criteria.
- Tested dynamic components (filters, tables, calculations) and end-to-end flows, finding defects before each delivery.
- Reported issues in Jira with impact and priority analysis.
- Kept test case traceability in Excel/TestRail and ran automated tests in CI/CD pipelines.

TECHNICAL SKILLS

Web automation (strong): Selenium WebDriver, Java, Serenity BDD, Cucumber, Gherkin, Page Object Model

Web automation (basic): Playwright, Cypress, Selenide

API testing: Postman, REST, JSON, HTTP methods, status codes

Test types: Functional, smoke, regression, integration, end-to-end

CI/CD and version control: Azure DevOps, Git, CI/CD pipelines

Test management: Jira, TestRail, Excel, test case design, traceability

Databases: SQL (SELECT, JOIN, GROUP BY, ORDER BY), data integrity

Languages: Java (main), JavaScript and Python (basic)

Methodologies: Agile, Scrum, Kanban, BDD

AI applied to QA: Test case and Gherkin generation with AI, reviewed by hand

EDUCATION AND LANGUAGES
